Group Name

Florence Bosco, CEO and Program Director, Life Sciences

Florence graduated from FPMs-UMons as a Chemical Engineer and began her career as an R&D Engineer at UCB, then as a Product Development Manager at Artelis, a startup now fully owned by Pall Corporation. These fascinating experiences convinced her to continue working on innovative projects related to Health, Science and Technology as a free lance. Her longest project brought her to co-found a non-profit patient recruitment organization together with the three university hospitals of Brussels before joining the i-Tech Incubator.
